

Antonis Chatzivasileiou

PhD candidate at the **Department of Computer Science, University of Crete**, with a Master's degree (2019–2021) in **computer networks** and **Software Defined Network (SDN) technologies**. His research focuses on the **global Internet infrastructure** and the **geopolitical analysis of inter-country interconnections**. Since 2019, he has been actively involved as a **teaching assistant** in both undergraduate and postgraduate networking courses. In parallel, he has experience in **web application development**, **Docker containers**, **container orchestration technologies** (e.g., Kubernetes), and **cloud services such as AWS**. He has received a **scholarship from the Internet Society** and has **presented his work at international scientific conferences**.
